Forex Risk Disclosure:

The National Futures Association (NFA) and CFTC (Commodity Futures Trading Commission), the regulatory agencies for the forex and futures market in the United States, require that customers be informed about potential risks in the forex market. If you don't understand any of the information provided on this page, please contact us or seek advice from an independent financial advisor.

Risk Associated with Forex Trading Off-exchange foreign currency trading on margin carries a high level of risk and may not be suitable for all investors. The high degree of leverage can work against you as well as for you. Before deciding to invest in foreign exchange you should carefully consider your investment objectives, level of experience, and risk appetite.

The possibility exists that you could sustain a loss of some or all of your initial investment and, therefore, you should not invest money that you cannot afford to lose. You should be aware of all the risks associated with off-exchange foreign currency trading and seek advice from an independent financial advisor if you have any doubts.

TheInnerCircleTrader.com Market Opinions:

Any opinions, news, research, analyses, prices, or other information contained on this website is provided as general market commentary, and does not constitute investment advice. <http://www.TheInnerCircleTrader.com>, Michael J. Huddleston, aka "ICT" and or The Inner Circle Trader will not accept liability for any loss or damage, including without limitation to, any loss of profit, which may arise directly or indirectly from use of or reliance on such information.

Accuracy of Information The content on this website is subject to change at any time without notice, and is provided for the sole purpose of assisting traders to make independent investment decisions. <http://www.TheInnerCircleTrader.com> has taken reasonable measures to ensure the accuracy of the information on the website, however, does not guarantee its accuracy, and will not accept liability for any loss or damage which may arise directly or indirectly from the content or your inability to access the website, for any delay in or failure of the transmission or the receipt of any instruction or notifications sent through this website.

Government Required Risk Disclaimer and Disclosure Statement:

CFTC RULE 4.41 - HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN LIMITATIONS. UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL TRADING. ALSO, SINCE THE TRADES HAVE NOT BEEN EXECUTED, THE RESULTS MAY HAVE UNDER-OR-OVER COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY. SIMULATED TRADING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFIT OR LOSSES SIMILAR TO THOSE SHOWN.

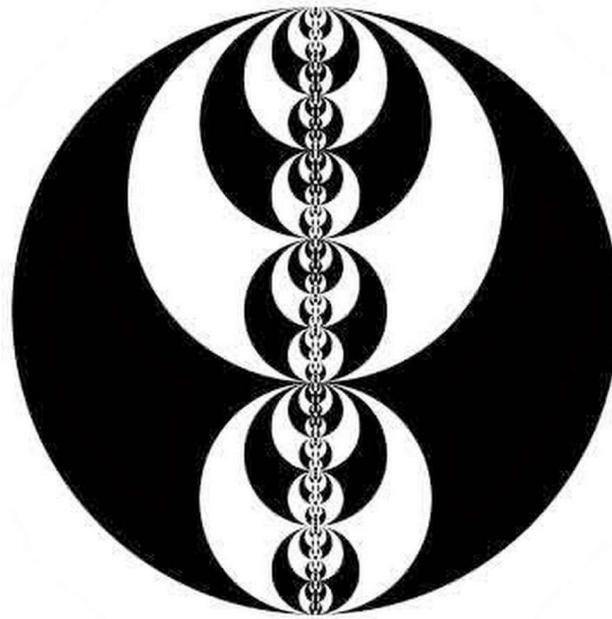

Trading performance displayed herein is hypothetical. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance trading results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk in actual trading. For example, the ability to withstand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual trading results.

U.S. Government Required Disclaimer - Commodity Futures Trading Commission Futures and Options trading has large potential rewards, but also large potential risk. You must be aware of the risks and be willing to accept them in order to invest in the futures and options markets. Don't trade with money you can't afford to lose. This is neither a solicitation nor an offer to Buy/Sell futures or options. No representation is being made that any account will or is likely to achieve profits or losses similar to those discussed on this web site. The past performance of any trading system or methodology is not necessarily indicative of future results. Trade at your own risk. The information provided here is of the nature of a general comment only and neither purports nor intends to be, specific trading advice. It has been prepared without regard to any particular person's investment objectives, financial situation and particular needs. Information should not be considered as an offer or enticement to buy, sell or trade.

You should seek appropriate advice from your broker, or licensed investment advisor, before taking any action. Past performance does not guarantee future results. Simulated performance results contain inherent limitations. Unlike actual performance records the results may under or over compensate for such factors such as lack of liquidity. No representation is being made that any account will or is likely to achieve profits or losses to those shown. The risk of loss in trading can be substantial. You should therefore carefully consider whether such trading is suitable for you in light of your financial condition.

If you purchase or sell Equities, Futures, Currencies or Options you may sustain a total loss of the initial margin funds and any additional funds that you deposit with your broker to establish or maintain your position. If the market moves against your position, you may be called upon by your broker to deposit a substantial amount of additional margin funds, on short notice in order to maintain your position. If you do not provide the required funds within the prescribed time, your position may be liquidated at a loss, and you may be liable for any resulting deficit in your account.

Under certain market conditions, you may find it difficult or impossible to liquidate a position. This can occur, for example, when the market makes a "limit move." The placement of contingent orders by you, such as a "stop-loss" or "stop-limit" order, will not necessarily limit your losses to the intended amounts, since market conditions may make it impossible to execute such orders. By viewing any <http://www.TheInnerCircleTrader.com> text, audio, visual commentary, video or presentation, you acknowledge and accept that all trading decisions are your own sole responsibility, and the author, Michael J. Huddleston and anybody associated with <http://www.TheInnerCircleTrader.com> cannot be held responsible for any losses that are incurred as a result.

ICT Monthly Mentorship

ICT Megatrades - Commodities

What Are Megatrades?

Large Price Swings or Trends that can produce massive “potential gains” – that when compared to relative markets – outperforming all others.

They are historically easy to spot in past Price Action every calendar year.

Huge Institutional Sponsorship coupled with Strong Influences from actual Supply & Demand fuel these moves.

ICT Monthly Mentorship

ICT Megatrades - Commodities

Commodity Specialist?

When following the Commodity Markets it is best to avoid being a “Specialist” or one market Trader.

A favorite Commodity can provide plenty of setups to consider but it might be a “Sleeper” while other markets are on fire.

Commodities offer a small universe of markets to analyze & seek Megatrades.

ICT Monthly Mentorship

ICT Megatrades - Commodities

Agricultural Markets

The first area we look for annual Megatrades is the Agriculturals.

These are markets that feed the world and as a result will have even greater Supply & Demand factors that move them.

Droughts, insect damage, frost or bumper crops will have enormous effects on Prices in these markets.

ICT Monthly Mentorship

ICT Megatrades - Commodities

Grain Markets

The Grain Complex:

- Soybeans
 - Soybean Meal
 - Soybean Oil
 - Wheat
 - Corn
 - Oats
 - Canola
 - Rice
- Thin & Don't Trade

ICT Monthly Mentorship

ICT Megatrades - Commodities

Livestock Markets

The Meat Complex:

- Live Cattle
- Feeder Cattle
- Lean Hogs

ICT Monthly Mentorship

ICT Megatrades - Commodities

Soft Markets

Food Group:

- Coffee
- Cocoa
- Sugar
- Orange Juice

ICT Monthly Mentorship

ICT Megatrades - Commodities

Soft Markets

Food Group:

- Coffee
- Cocoa
- Sugar
- Orange Juice

Fiber:

- Cotton

ICT Monthly Mentorship

ICT Megatrades - Commodities

Financial Markets

The next area we look for annual Megatrades is the Financials.

These markets are hard in nature and industrious. Industrial Supply & Demand factors move them.

Wars, Economic drivers, Interest Rates, imports and exports will have greater impacts on these kinds of Commodities.

ICT Monthly Mentorship

ICT Megatrades - Commodities

Metal Markets

Precious:

Gold

Silver

Palladium

Platinum

Thin & Don't Trade

Industrial:

High Grade Copper

ICT Monthly Mentorship

ICT Megatrades - Commodities

Energy Markets

Crude Oil

Heating Oil

Gasoline

Natural Gas

* I have no experience trading futures in Natural Gas – it has been active in recent years.

ICT Monthly Mentorship

ICT Megatrades - Commodities

Fundamentals Matter

Commodities require a measure of Fundamental consideration in our analysis.

We do not have to wade through dry, boring crop reports or cattle head reports.

A simple newspaper headline might be all that's needed to draw a Fundamental conclusion.

ICT Monthly Mentorship

ICT Megatrades - Commodities

Fundamental Starting Point

A quick & easy first step is to consult the delivery month closing prices.

Note if any commodity has a Premium over distant months out. This will be our Primary search every year – for explosive Bull Markets.

* We do not require a Premium to be Bullish a Commodity – it merely adds to the likelihood of a “strong” Price Rally.

ICT Megatrades - Commodities

Dollar Based Analysis

Generally, when the US Dollar is declining – this allows Commodity Prices to rise.

Conversely, when the US Dollar rises – this pressures Commodity Prices lower.

* There can and will be periods lasting as long as a year when Commodity Prices & the US Dollar move in tandem. We can never be 100% accurate.

ICT Monthly Mentorship

ICT Megatrades - Commodities

Sector Group Leaders

When we are expecting higher Commodity Prices in general – we will seek to filter those markets that exhibit very bullish characteristics.

When we are expecting lower Commodity Prices in general – we will seek to filter those markets that exhibit very bearish characteristics.

* There can opportunities to be contrarian in either of the conditions explained above.

ICT Monthly Mentorship

Visual Accumulation

ICT Monthly Mentorship

ICT Megatrades - Commodities

Seeking Megatrades

The process in simple terms:

1. Search Headlines for Commodities
2. Select Premium Markets
3. Confer with USDX direction.
4. Use Relative Strength In Each Sector.
5. Filter leader from each Sector.
6. Try to follow one leader from each.
7. Use Option prices for paper trades too.

* This is a overview that will be refined in detail in the August pdf files for Commodity Top Down Analysis.

ICT Monthly Mentorship

ICT Megatrades - Commodities

The Commodity Basket

Not every Commodity Sector will perform well. Not every selected “Leader” will perform or outperform as expected.

Due to the lack of perfection – our diversified approach in all the Sectors will - in theory – increase the odds of capturing a Megatrade in one or more Sectors.

The magnitude and energy seen in the “Winners” will many times cover the collateral damage the underperformers will generate post trade.

ICT Monthly Mentorship

ICT Megatrades - Commodities

The Treasure Seeker Mindset

Some might feel this may perhaps be a lot of “work” to find a market move. Or maybe it might seem boring to sift through charts for generic conditions.

From my first day looking for the annual big movers – I likened it to a Treasure hidden that I have to find. Like most anything – if you turn it into a game... it makes it fun!

Every new calendar year presents a new Treasure Hunt...

ICT Monthly Mentorship

ICT Megatrades - Commodities

Homework:

With the benefit of hindsight – I'd like to encourage you to look at 2016.

Study the big movers of 2016 in the Commodity Markets. See if you can see the things described in this lesson.

We will review 2016 examples this coming Friday & teach how to get back data for practice in a Live Webinar for your learning. Get into those Treasure Maps... I mean Price Charts.

ICT Monthly Mentorship

ICT Megatrades – Forex & Currencies

Quarterly Shifts

The impact of Quarterly cycles in the markets as a whole – can never be overstated.

Every three months or so, the markets will tend to form an intermediate term turning point.

The overlapping of Megatrade conditions – coupled with this effect is crucial to finding the next explosive market moves.

ICT Monthly Mentorship

ICT Megatrades – Forex & Currencies

Seasonal Tendencies

Seasonal Tendencies are important for Megatrade selections as well.

We have covered all the salient Seasonal Tendencies for each market and asset classes.

The Seasonal Trend may or may not be a factor on all explosive moves – but most tend to be in alignment with this market phenomenon.

ICT Monthly Mentorship

ICT Megatrades – Forex & Currencies

The US Dollar Index

Every significant mover in the Forex or Currency Markets will have it's root in the Price Action of the US Dollar Index.

While on the very short term - and especially when it comes to Intraday Trading – the USDX can consolidate and still see Currencies trade stronger or weaker against it.

The search for Megatrades in Currencies will depend on the support of the trade idea in the US Dollar Index – or it's not a qualified Megatrade setup.

ICT Monthly Mentorship

ICT Megatrades – Forex & Currencies

Focusing On The Majors

Whether you like to trade the Majors or the Crosses – you need to focus on these Majors for Megatrade selections.

Eur/Usd – *Fiber*

Gbp/Usd – *Cable*

Aus/Usd – *Aussie*

Nzd/Usd – *Kiwi*

Usd/Chf – *Swissy*

Usd/Cad – *Loonie*

Usd/Jpy – *Yen*

All major moves can be determined with these 7 pairs and they are all you ever need to trade or follow.

ICT Monthly Mentorship

ICT Megatrades – Forex & Currencies

Focus On The Futures

The Majors have futures contracts that trade respectively and this aids further in our analysis for searching the Market place for explosive moves.

- Euro Dollars
- British Pounds
- Australian Dollars
- New Zealand Dollars
- Swiss Francs
- Canadian Dollars
- Japanese Yen

There may be something in the Price Action of the underlying futures that leads to an opportunity – that ultimately unfolds as a Megatrade.

ICT Monthly Mentorship

ICT Megatrades – Forex & Currencies

Relative Strength Analysis

There are two approaches to performing Relative Strength Analysis as I define it.

The first is to use the underlying futures Price Action comparably - measuring respective Highs and Lows.

The second is to use an overlay tool in the Forex market – measuring respective Highs and Lows.

ICT Monthly Mentorship
